SUMMARY

Results-driven full-stack developer specializing in building scalable, high-performance web applications. Experienced in developing real time features, secure payment systems, and efficient backend architectures. Passionate about transforming complex challenges into intuitive, user-friendly solutions that deliver real business impact.

EDUCATION

University of Mumbai

Graduated 2025

B.E in Computer Engineering (Honors in Cybersecurity) | 7.50 CGPA

EXPERIENCE

Tax-O-Smart | ReactJS Developer

[Aug 2025- Present]

- Developed and deployed responsive web applications using React.js for tax-related platforms (TaxoSmart, RJSa, TDS).
- Collaborated with backend teams and supported API integration, while Collaborated with backend teams for API integration and handled MySQL-based data rendering and updates on the frontend.
- Improved frontend performance using lazy loading and optimized state management.
- Contributed across the full software development lifecycle, from design and development to deployment of production-ready applications, ensuring reliable and efficient delivery.

PROJECTS

InterviewIQ.AI — AI-Powered Interview Preparation Platform

[[GitHub](#) [Live Demo](#)]

- Built a SaaS platform where users upload resume (PDF) to get AI-generated interview questions with intelligent feedback
- Implemented credit-based system with Razorpay payments, Firebase Google Auth, and JWT-protected REST APIs
- Deployed on Render with Redux state management and Framer Motion animations

Food-Delivery Website

[[GitHub](#) [Live Demo](#)]

- Built full-stack food delivery app using MERN stack with Stripe payment integration and responsive UI
- Developed admin dashboard for real-time order management and deployed on Render

Beachify

[[GitHub](#) [Live Demo](#)]

- Full-stack tourism platform with live beaches data, real-time weather, WebSocket chat, and image uploads
- Integrated Stripe payments for hotel & tour bookings, deployed on Render with cloud database

SKILLS

- Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Framer Motion, Redux Toolkit
- Backend: Node.js, Express.js, Multer
- Database & Authentication: MongoDB, Firebase Authentication, JWT
- Core: JavaScript, Python, REST APIs, WebSocket.io
- Payment Integration: Razorpay, Stripe
- Tools: Git, GitHub, Postman
- Deployment: Render, Vercel, Netlify

CERTIFICATIONS

- Technology Job Simulation – [Deloitte](#)
- Generative AI Studio – [Google Cloud](#)
- Prompt Engineering with GitHub Copilot – [Microsoft](#)
- AWS Academy Graduate
